RAHUL YADAV

Java Full Stack Developer | Spring Boot | Microservices | REST APIs

Delhi | +91 9027500529 | rahulydv5335@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Java Full Stack Developer with 3 years of experience building scalable, high-availability microservices and RESTful APIs using Java 8/11/17/21, Spring Boot, Spring Data JPA and Spring Cloud. Delivered enterprise retail and education platforms serving 600+ stores, with hands-on AWS (SQS, SNS, EC2, S3), Docker, Jenkins CI/CD and Agile/Scrum delivery. Experienced in legacy modernization (Struts to Spring Boot microservices), unit testing with JUnit and Mockito, and resolving high-priority production issues in direct collaboration with clients.

TECHNICAL SKILLS

Languages: Java, Java 8/11/17/21, JavaScript, SQL

Core Concepts: OOPS, Collections, Lambdas, Streams, Multithreading, Exception Handling

Frameworks: Spring Boot, Spring Data JPA, Hibernate, Spring Cloud, Spring Security (JWT), Microservices Architecture, REST APIs, Apache Struts 2, Angular, React.js, Node.js, Express

Cloud & DevOps: AWS (EC2, S3, SQS, SNS), Docker, Jenkins CI/CD

Databases: SQL Server, MySQL, MongoDB

Design Patterns: Singleton, Factory, Facade

Testing & Tools: JUnit 4, Mockito, Postman, Swagger, SonarQube, Git, GitHub, Bitbucket, Jira, GitHub Copilot

Methodology: Agile/Scrum, SDLC, Release Management, Client Collaboration

WORK EXPERIENCE

Personal Development | Upskilling & Project Work *Dec 2025 – Present*

- **Course:** Java Full Stack Development (Oct 2025 – Mar 2026), covering **Spring Boot, Microservices and REST APIs**.

Project: Order Management Microservices | Java 11, Spring Boot, Feign, MySQL, Docker | [GitHub link]

- Built Order, Inventory and Notification **Spring Boot microservices** communicating via **Feign client**.
- Secured APIs with **JWT authentication**, documented them using **Swagger**, and added unit tests with JUnit and Mockito.

Software Engineer | LTIMindtree, Bengaluru *Nov 2022 – Nov 2025*

Project: Tanishq NAP Application (Titan)

- Designed and developed end-to-end **RESTful APIs** to synchronize master data across **600+ retail stores**, ensuring seamless data flow between centralized and store-level systems.
- Built asynchronous, scalable data communication by publishing messages to **AWS SQS and SNS** queues via existing data sync services.
- Led migration of legacy **Struts-based modules** to **Spring Boot microservices**, while maintaining and enhancing existing functionality.
- Partnered directly with the client onsite to troubleshoot and resolve urgent production issues during high-traffic festival periods, ensuring zero downtime.
- Integrated **Feign client** for reliable inter-service communication across microservices.
- Automated build and deployment pipelines using **Jenkins CI/CD**, cutting release cycle time and improving delivery speed.
- Resolved critical backend bugs and feature requests, achieving a **40% reduction** in recurring support tickets and improving application reliability.

Software Engineer | LTIMindtree, Bengaluru *Jun 2022 – Nov 2022*

Project: AAMC (Association of American Medical Colleges) Modernized MDA Portal

- Supported a **Java Spring Boot microservices** platform powering education management for medical institutions across the US
- Authored unit tests with **JUnit 4 and Mockito**, achieving over **90% code coverage** on critical backend services.
- Participated in client meetings to present fixes, gather requirements, and translate feedback into development tasks.

EDUCATION

Bachelor of Technology, Computer Science and Engineering *May 2017 – Jun 2021*

Uttarakhand Technical University, Dehradun, Uttarakhand

CERTIFICATIONS

- Java Full Stack Development Course (Oct 2025 – Mar 2026)
- Java 8 New Features in Simple Way — Udemy
- Master Microservices with Spring Boot and Spring Cloud — Udemy
